Introduction

Uckfield Community of Practice is one of four in High Weald Lewes Havens CCG. This narrative describes Uckfield in the East Sussex context. It is based on 2017 JSNAA scorecard data, presented in the form of indicator tables (Appendix 1) in which East Sussex localities/communities of practice and CCGs are RAG-rated against East Sussex. Further tables and charts summarise key statistics and specific topics (such as hospital admission and attendance rates) for this community of practice.

For ease of reference, throughout the rest of this area summary the term 'localities' is used to refer to the 4 HWLH CCG communities of practice as well as the 3 localities in EHS CCG and the 3 localities in HR CCG.

The RAG-rated tables highlight statistically significant differences between Uckfield and East Sussex. Individual JSNAA scorecards are referenced alongside the indicator titles; if data has been modelled from LA to NHS geographies indicator titles are flagged with (M). For indicators where locality or CCG data is not available, values for Wealden District (based on the LA view JSNAA scorecards and area summaries) are discussed.

For more in-depth information on how GP practices, as well as localities and CCGs, compare to East Sussex, this report should be read alongside the NHS view JSNAA indicator scorecards.

Here 'significance' refers to statistical significance at the 95% confidence level.

In the tables (Appendix 1) statistically significant differences between Uckfield and East Sussex are flagged in red/green and dark blue/light blue and the indicator values are given. But note that, for values based on large numbers, even small, possibly unimportant, differences can be statistically significant. Conversely, values based on small numbers can be substantially, but not (in statistical terms) significantly different to East Sussex.

Some rates are age and/or sex standardised. For those that are not, such as the GP-reported prevalence of diabetes and other chronic diseases, it is important to take into account the age profile of the population, as they are likely to be higher in areas with older age profiles.

NHS and LA view JSNAA scorecards and area summaries can be downloaded from www.eastsussexjsna.org.uk/scorecards.

The following products can also be downloaded from the East Sussex JSNAA website:

GP Practice Profiles and Locality/Community of Practice Profiles

Spine charts are used to compare the GP practice or locality/community of practice to East Sussex for all available JSNAA indicators.

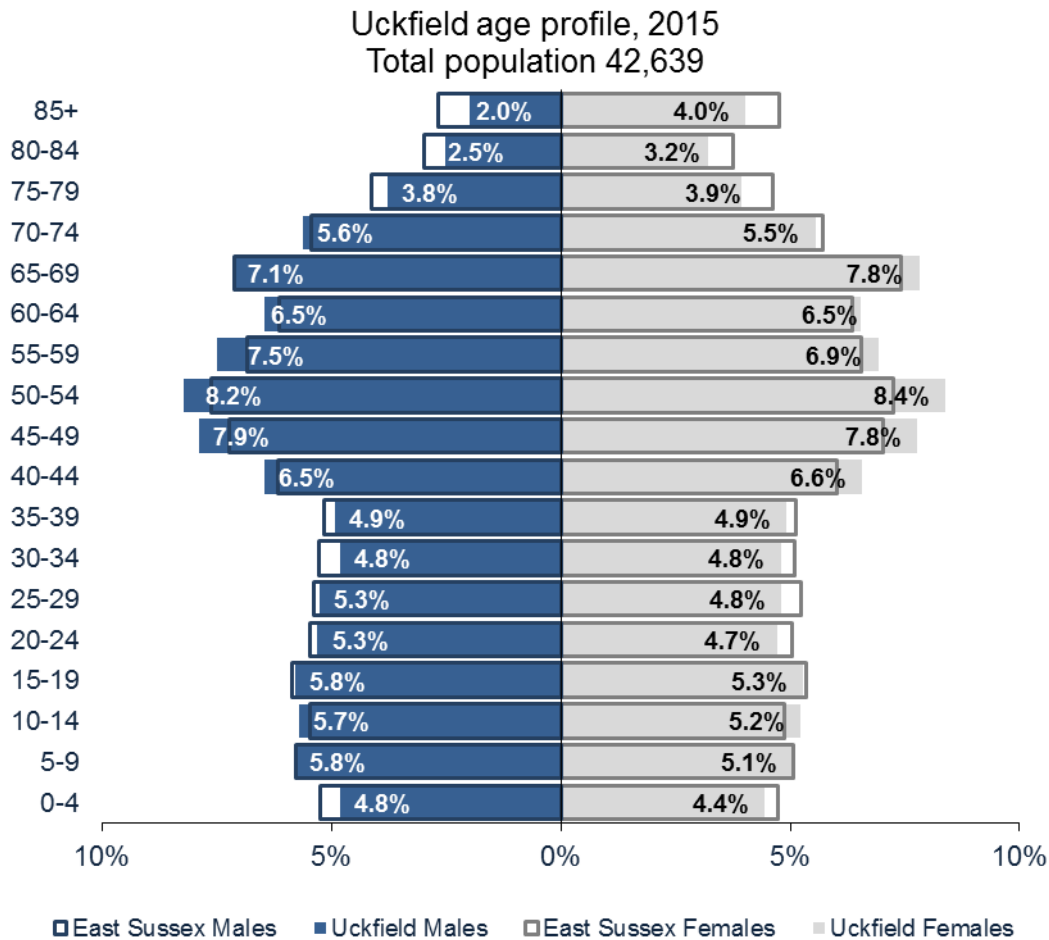

See <http://www.eastsussexjsna.org.uk/PracticeProfiles2017>

Local Needs and Assets Profiles

East Sussex, its districts/boroughs and CCGs are compared to England. RAG-rated tables similar to those in Appendix 1 (but with England as the benchmark) are included.

See <http://www.eastsussexjsna.org.uk/overviews/localneedsprofile.aspx>

Population

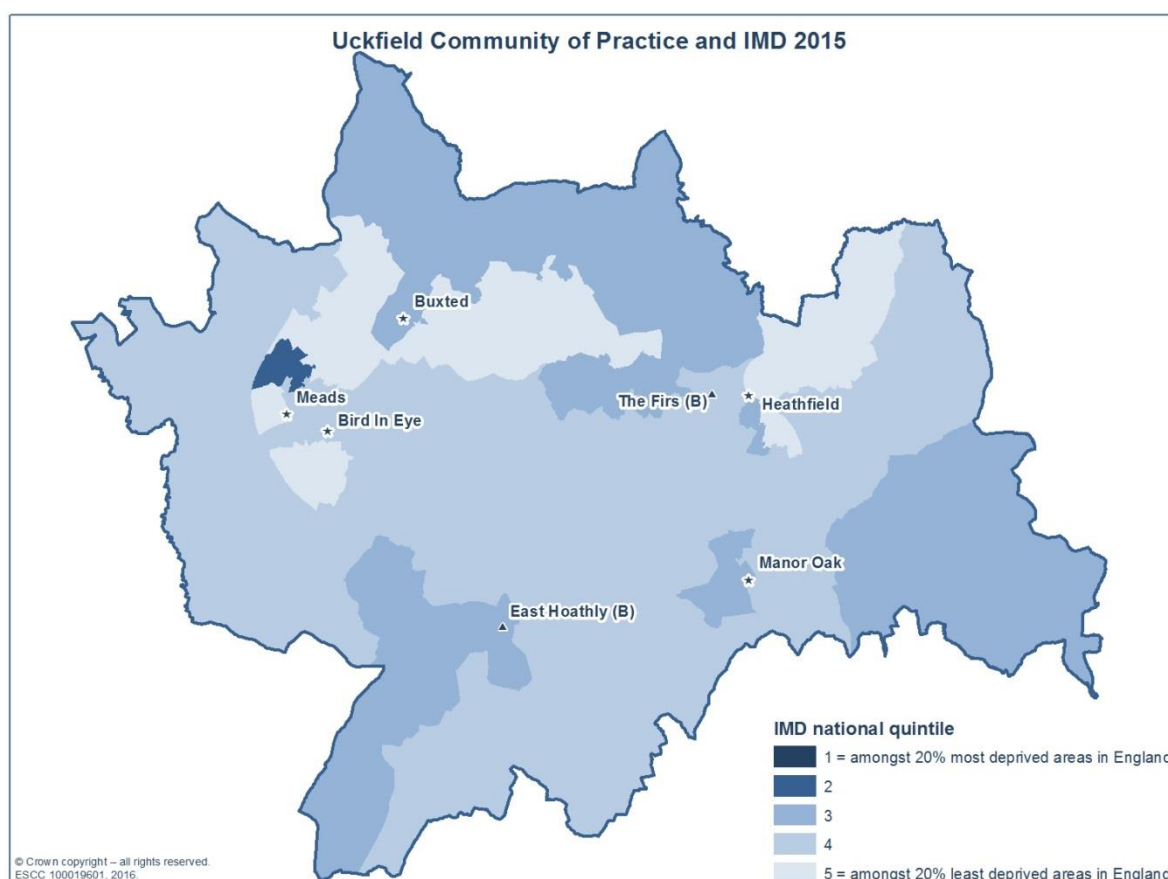

Uckfield has amongst the highest percentages of working age people and the lowest of people age 85 year olds and over of all East Sussex localities. The dependency ratio (of non-working age people compared to working age people) is significantly lower than for East Sussex, as are rates of lone parent households and births to teenage mothers.

Table 1 shows the estimated population changes between 2015 and 2021 for specific age groups as well as all ages. Using projections modelled from East Sussex districts and boroughs, the table shows that over the next 6 years some age groups are projected to increase in size whilst others will decrease in size. The net effect is that the population of Uckfield is estimated to increase, with the largest estimated increase in those aged 85 years and over.

Table 1: Population projections for all persons (number and percentage change) showing the increase (positive) or decrease (negative) from 2015 to 2021 (modelled)

| Population projections from 2015 to 2021 | | | | | | |
|--|-------------|-------|----------|-------|--------------------------------|-------|
| Population Change | East Sussex | | HWLH CCG | | Uckfield Community of Practice | |
| | Number | % | Number | % | Number | % |
| 0-19 years | 900 | 0.8% | 1,000 | 2.8% | 300 | 3.1% |
| 20-64 years | -2,100 | -0.7% | 700 | 0.7% | 400 | 1.5% |
| 65+ years | 14,600 | 11.0% | 4,700 | 12.5% | 1,300 | 13.3% |
| 85+ years | 3,200 | 15.8% | 1,200 | 23.8% | 350 | 25.9% |
| All Ages | 13,500 | 2.6% | 6,900 | 4.2% | 2,050 | 4.9% |

Wider determinants

Uckfield has some of the lowest levels of income deprivation (including children and older people) and employment deprivation, of all East Sussex localities. It also has amongst the lowest rates of working age people claiming JSA, UC or ESA. It has a significantly lower percentage (the lowest of all localities) of households able to access a GP within 15mins by public transport or walking.

Educational achievement is similar to East Sussex. Uckfield is amongst the lowest for pupils with SEN on SEN support, and is significantly lower than East Sussex for 16-18 year olds NEET and working age population with no or low qualifications.

Compared to East Sussex a significantly higher percentage of households are owned and a significantly lower percentage rented. A significantly lower percentage of households are overcrowded.

It has significantly lower rates of crime and the lowest of all East Sussex localities.

Overall health status

Self-reported ill health and LLTI or disability, and premature all-cause mortality and preventable mortality, are significantly lower than in East Sussex. But Uckfield has the lowest life expectancy at age 75 of all East Sussex localities.

Healthy lifestyles

Pregnancy and infancy

Uckfield has significantly higher rates of breastfeeding initiation and breastfeeding at 6-8 weeks than East Sussex and the lowest rate of low birth weight babies of all localities.

Physical activity and excess weight

It has similar levels of overweight or obese children to East Sussex. Wealden District has the highest levels of adults achieving 150 minutes physical activity per week, and the lowest levels of overweight or obese adults, of all districts/boroughs.

Smoking

It has significantly lower levels of mothers who are current smokers at the time of delivery, and of smoking quitters, than East Sussex. Wealden District has significantly lower smoking-attributable mortality and the lowest of all the districts and boroughs.

Alcohol and drug misuse

It has significantly lower rates of young people in drug or alcohol treatment and adults in drug treatment than East Sussex. Wealden District has significantly lower alcohol-related hospital admissions and the lowest of all the districts/boroughs.

Sexual health

Wealden District has the lowest under 18s conceptions and chlamydia detection rates (significantly lower than East Sussex for people aged 25+) of all the districts/boroughs. The gonorrhoea detection rate is also lower than for East Sussex.

Accidents and injuries

A&E attendances and emergency admissions for accidents and injuries in 0-4 year olds are significantly lower than for East Sussex and amongst the lowest of all the localities. Emergency admission rates for older children and young people, and for falls injuries in older people, are similar to East Sussex. Wealden District has a significantly higher rate of people killed or seriously injured on the roads than East Sussex.

Health protection

Uckfield is significantly worse than East Sussex for eligible people receiving an NHS health check, but significantly better for the uptake of screening for cervical, breast and bowel cancers. It is similar to or significantly better than East Sussex for child immunisations, but significantly worse for immunisations for persons aged 65 years or over.

Disease and poor health

Mental health and wellbeing

Uckfield has a significantly lower incidence of depression, prevalence of severe mental illness, emergency mental health admissions and rate of working age people claiming ESA due to mental health problems, than East Sussex.

Circulatory

It generally has significantly lower prevalences of circulatory conditions (not age-standardised) than East Sussex. It also has significantly lower emergency CHD admissions and premature mortality due to circulatory diseases.

Cancer

Premature mortality due to cancer is similar to East Sussex. HWLH CCG has similar incidence and mortality to East Sussex for lung, colorectal, breast and prostate cancers.

Respiratory

Uckfield has significantly lower asthma and COPD prevalences (not age-standardised) than East Sussex. It also has significantly lower emergency admissions due to asthma (and emergency admissions per 100 registered asthmatics) and emergency admissions due to COPD. Premature mortality from respiratory conditions is also significantly lower.

Diabetes

It has a significantly lower prevalence of diabetes (not age-standardised) and lower emergency admissions for diabetes than East Sussex.

Other chronic conditions

It has a significantly lower prevalence of CKD but a significantly higher prevalence of learning disabilities (second highest of all localities).

Avoidable admissions

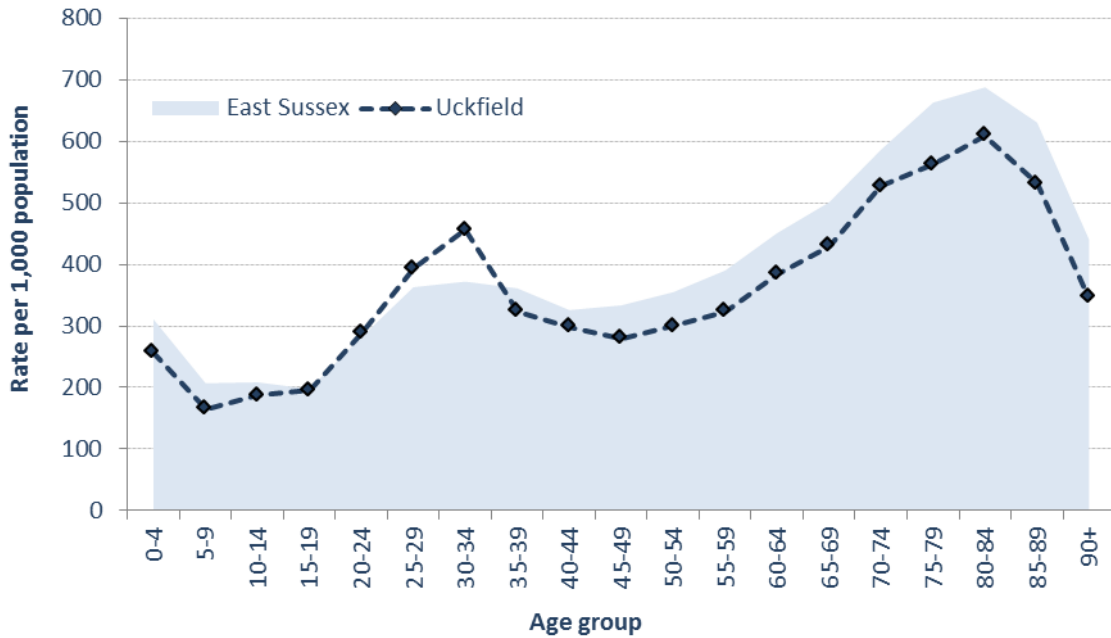

It has significantly lower emergency admissions for under 20s admitted for LRTIs and diabetes/epilepsy/asthma and for chronic and acute ACS conditions than East Sussex.

Hospital admissions and attendances

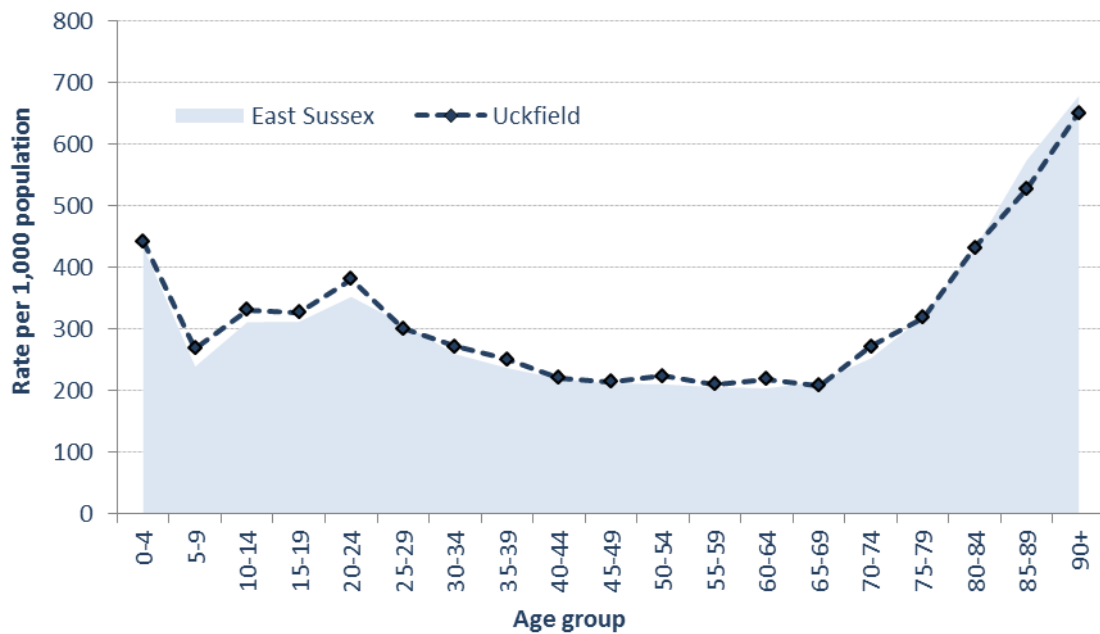

Uckfield has significantly lower first outpatient attendances and DNA rates than East Sussex. It has significantly higher A&E/MIU attendance rates for all ages. Elective admissions are significantly lower for people of all ages and people aged 65+. Emergency admissions are significantly lower for people of all ages, and those aged 70-84 and 85+.

The following graphs present the age-specific overall attendance and admission rates for Uckfield compared to East Sussex.

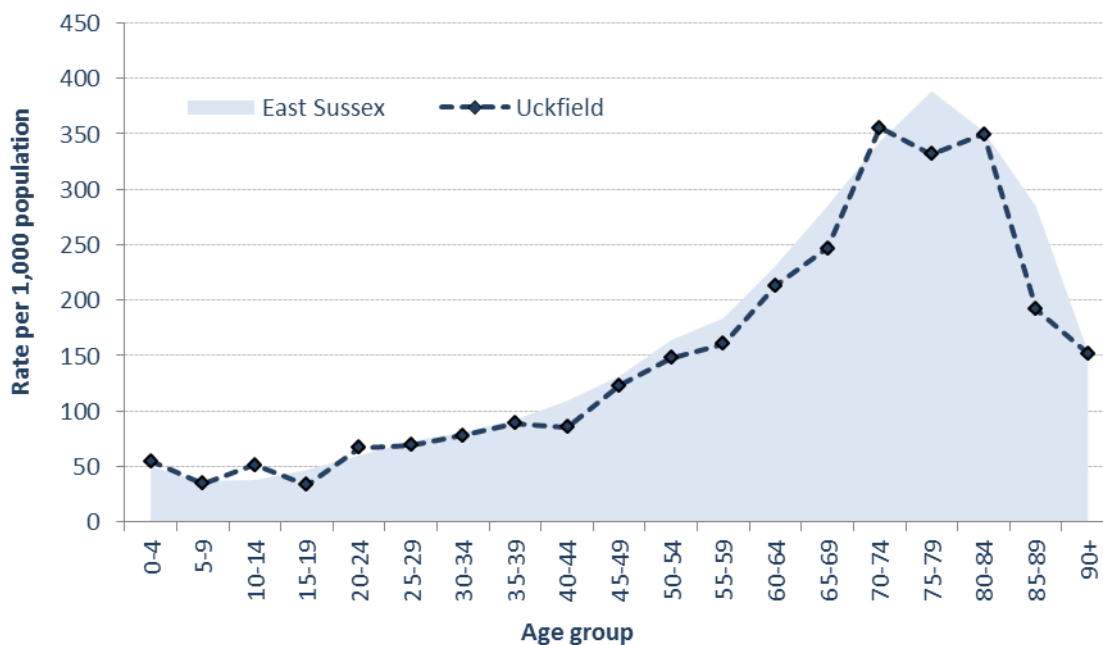

Age-specific outpatient attendance rates

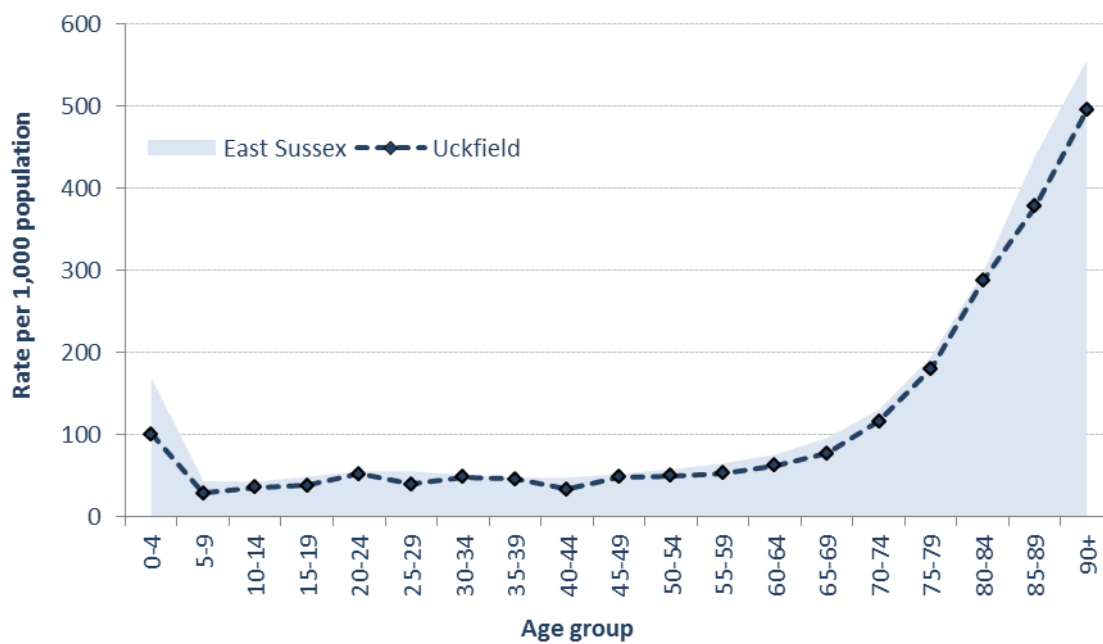

Age-specific A&E/MIU attendance rates

Age-specific elective admission rates

Age-specific emergency admission rates

Social care

Children's services

Uckfield is significantly lower than East Sussex for referrals to children's social care, children on child protection plans and looked after children.

Carers

Compared to East Sussex Uckfield is significantly lower for: unpaid carers, working age people claiming Carers Allowance, carers known to adult social care and those receiving self-directed support.

Adult social care

It is significantly lower than East Sussex for: requests for ASC support, adults receiving direct payments self-directed support, long term support, community equipment, ASC funded lifeline or telecare, and adults in council supported residential or nursing care.

NHS dental services

Compared to East Sussex significantly higher percentages of children and working age people, but a similar percentage of older people, access East Sussex NHS general dental services.

GP patient survey

The percentage of patients responding to the GP Patient Survey is significantly higher than for East Sussex. But the percentages of patients reporting a good experience of their surgery, of making appointments and satisfaction with opening hours are all significantly lower.
